

EARLY versus ADVANCED BREAST CANCER

Be counted at www.advancedbreastcancercommunity.org/count-us-know-us-join-us/be-counted to show your support.

While breast cancer remains the second leading cause of death for women around the world, the majority of the public's focus goes towards prevention, surviving and cure. However, metastatic or advanced breast cancer, the most severe stage of the disease, is incurable, which means advanced breast cancer patients are often left out of the conversation.

1 in 8 women

will be diagnosed with breast cancer in her lifetime

That's
11.7
MILLION
people each
year

Of these, **30%** will develop metastatic disease

of related deaths are caused by metastases

YET

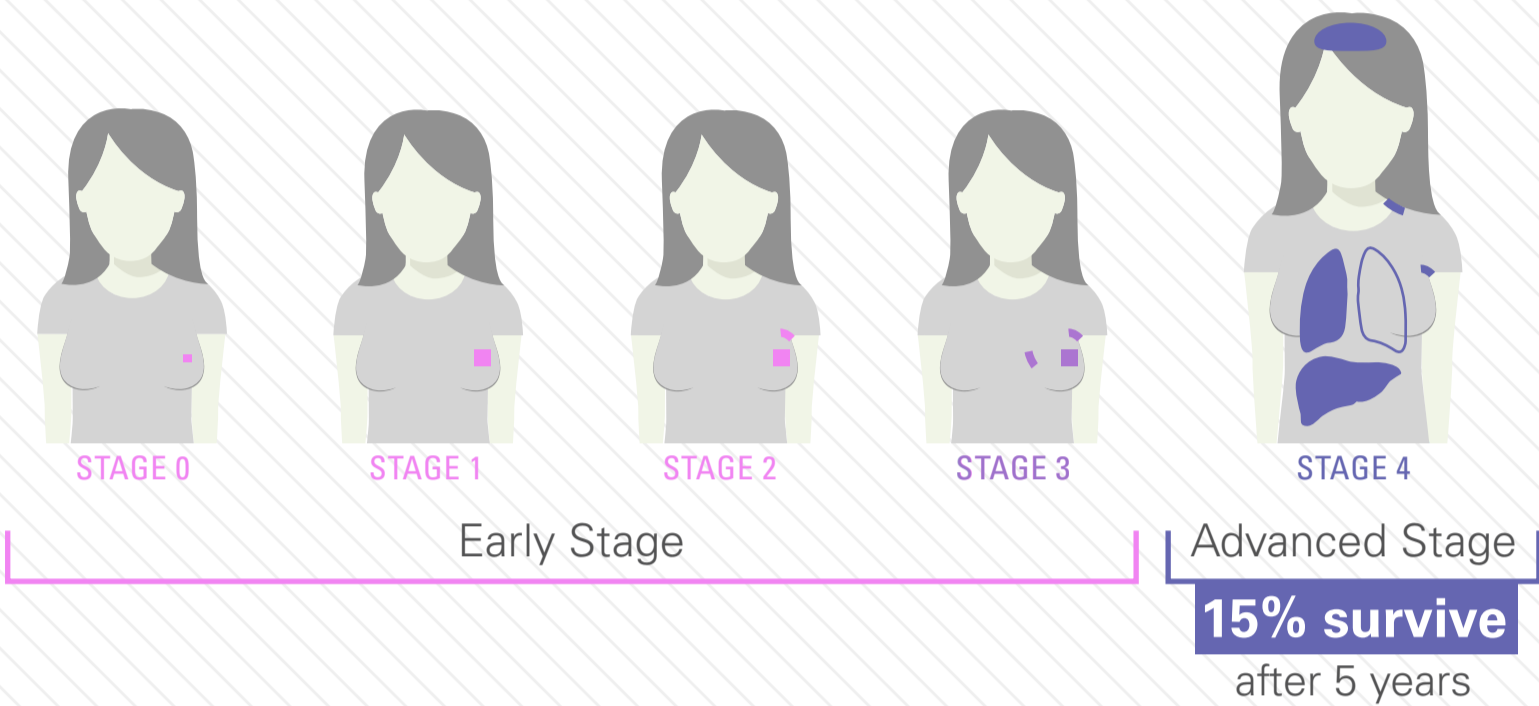

of patients struggle to find relevant information

ADVANCED OR METASTATIC BREAST CANCER IS KNOWN AS STAGE 4

Curable

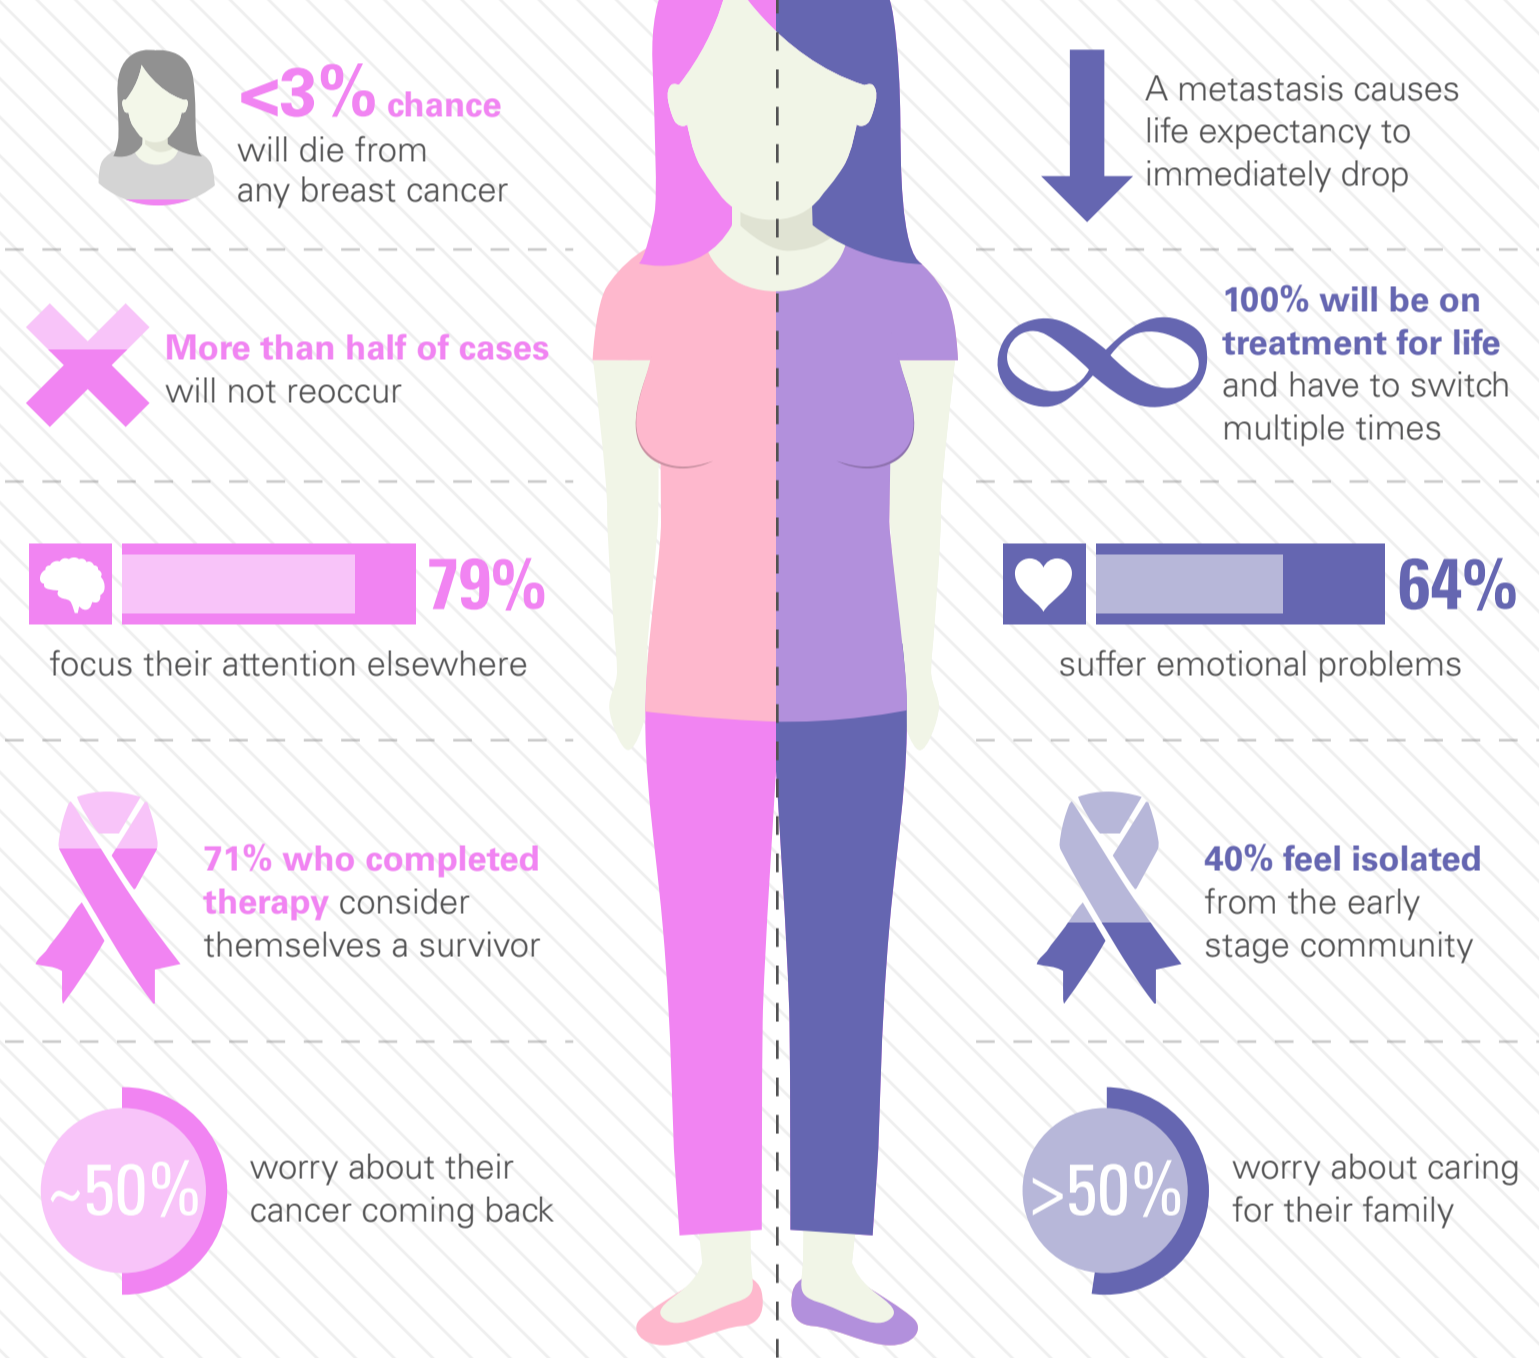

Incurable

WHAT YOU NEED TO KNOW

Early Stage

Advanced Stage

WHAT THE METASTATIC COMMUNITY NEEDS

More Information

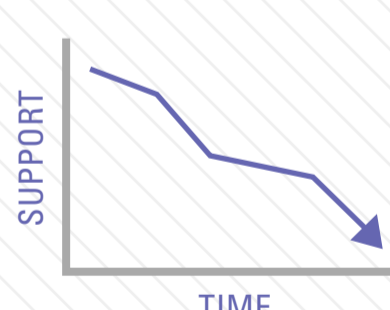

50% of patients feel this way

More Funding

2% Funding for advanced stage

More Support

40% of patients said support wanes over time

Please visit advancedbreastcancercommunity.org to learn more about the advanced or metastatic breast cancer community
